Professional Experience

AT&T Communication Services

Staff Associate, Bengaluru, Karnataka
08/2019 - Present

- Worked with the Internal Transformation Team to develop and enhance the Internal Ticketing Tool, adding new features, optimizing existing functionalities, and improving operational efficiency.
- Collaborated with cross-functional teams to integrate feedback, refine workflows, and enhance system performance.
- Automated manual tasks for the networking team by developing a web-based solution using HTML, CSS, and JavaScript, reducing repetitive work and increasing productivity by 20%.
- Helped streamline processes, improving response times for network-related issues.
- Initially supported internet services, later transitioned to voice-based service support, and eventually took on software development responsibilities within the team.

AT&T Communication Services

Internship Trainee, Bengaluru, Karnataka
02/2019 - 07/2019

- Completed a comprehensive internship program focused on tech support.
- Demonstrated strong problem-solving skills, leading to a full-time offer based on performance.

Projects

Travel Town Holidays Website
- **Version 1:** Built the initial version using HTML, CSS, Bootstrap, Express.js, Node.js, and MongoDB to provide essential travel booking functionality.
- **Version 2:** Refactored the frontend with React.js and Styled Components, improving maintainability and user experience.
- **Version 3 (Latest):** Further optimized performance and enhanced UI/UX using Next.js, Tailwind CSS, and better API handling, making the site more responsive and scalable.

Education

B.Tech in Electronics and Communications Engineering

PES University, Bengaluru, Karnataka 05/2019
